Riya Panwar

Software Engineer — Full Stack Development — Open Source Contributor

+91 8955075799 - Portfolio - riyapanwar0307@gmail.com - LinkedIn - github.com/riyap03

EDUCATION

Engineering College Bikaner (ECB) **Bikaner, Rajasthan, India**
B.Tech in Computer Science Engineering *2024 - 2028*

TECHNICAL SKILLS

Programming Languages: C++, JavaScript, TypeScript, Python
Frontend: HTML5, CSS3, React.js, Next.js, Tailwind CSS
Backend: Node.js, Express.js, Fastify, FastAPI, RESTful APIs, JWT, Authentication, Authorization
Databases: MongoDB, MySQL, PostgreSQL
Tools: Git, GitHub, Postman, Docker, VS Code, Railway, Vercel, Render
Core CS & Concepts: DSA, OOP, DBMS, Operating Systems, Computer Networks, System Design, API Testing

WORK EXPERIENCE

Full Stack Developer Intern
RJVertex, India *June 2026 - July 2026*

- Developed core features for **OpenJobsIndia**, an AI-driven recruitment platform, using Next.js, FastAPI, and PostgreSQL.
- Built candidate and recruiter portals with intelligent job matching, multi-job applications, and advanced applicant filtering.
- Implemented bulk shortlist/reject workflows to streamline large-scale recruiter hiring operations.

Web Development Intern
InAmigos Foundation, India *May 2026*

- Enhanced the NGO website UI/UX by improving responsiveness, accessibility, and overall user experience across multiple pages.
- Implemented and optimized core website functionalities, including donation portal workflows, to streamline user engagement and contribution processes.

PROJECTS

- **SkillSnap** – AI-powered portfolio and career roadmap platform built using React, Node.js, Fastify, PostgreSQL, and AI APIs. Implemented dynamic portfolio generation with live preview, PDF export, and personalized learning roadmaps based on user skill analysis. GitHub
- **Sahara** – Designed and developed an elder-care application support service that utilizes intelligent backup matching, voice assistance, and emergency caregiver coordination by developing on React Native, Node.js, Express, and postgreSQL. GitHub
- **QueryChase AI** – Built AI-powered document query platform during HackRx 6.0 using React, Node.js, and NLP pipelines, enabling natural-language interaction with PDFs through optimized parsing and contextual response generation. GitHub

OPEN SOURCE CONTRIBUTIONS

- **Fastify**: Fixed flat route printing behavior in `printRoutes({ commonPrefix:false })` (PR #6275)
- **Fastify**: Added ESLint max-len rule for improved code quality (PR #6269)
- **Microsoft Terminal**: Contributed to dynamic WSL detection and environment change handling

ACHIEVEMENTS

- Grand Finalist – Hackshastra National Hackathon (Top among 2000+ participants)
- Built QueryChase AI during HackRx 6.0 Hackathon
- Training & Placement Student Coordinator at ECB
